PROFESSIONAL EXPERIENCE

- 📅 **09/2017 – Present | Bell Canada (Technology Services - TS)**
Senior Manager, Application Architecture & Enterprise Delivery
 - Primary technology partner for Bell Business Markets (BBM): continuously aligning technical roadmaps, prioritizing platform investments, and driving enterprise delivery.
 - Lead a multidisciplinary team of ~20 professionals (product managers, architects, developers, Scrum Masters, analysts, and delivery partners).
 - Act as a trusted advisor to senior executives (BBM / TS leadership); present business cases (OPEX/CAPEX), architectural roadmaps, risk profiles, and delivery scorecards.
 - Partner seamlessly with BBM business operations, network/telecom teams, enterprise architecture, cybersecurity, and external system integrators.
 - Establish platform governance standards, engineering quality benchmarks, and uphold 24/7 resilience for critical services.
 - Drive the adoption of workflow automation and AI agent frameworks to streamline developer productivity and operational efficiency.
- 📅 **02/2014 – 09/2017 | Bell Canada (Technology Services - TS)**
Senior Business Analyst – Systems & Enterprise ITSM
 - Directed systems elicitation and business requirement engineering for major enterprise IT service and asset management initiatives supporting Bell Business Markets (BBM).
 - Served as principal reviewer for solution design, ITIL workflow modeling, and end-to-end integration testing for complex platforms (Maximo, TSMR, CCMD, TAMIT).
 - Standardized operational readiness and release support protocols for operations teams.
- 📅 **02/2011 – 02/2014 | Bell Canada (Technology Services - TS)**
Systems Business Analyst – Telecom Managed Services
 - Formulated detailed functional and technical requirements for key Managed Services engagements supporting Bell Business Markets (BBM) enterprise clients.
 - Coordinated operational readiness testing, system integration validation, and tier-3 post-launch incident resolution.
- 📅 **08/2007 – 02/2011 | IBM**
Software Developer / Solutions Engineer
 - Built automated industrial inspection tools and algorithmic vision systems for high-yield semiconductor manufacturing.
 - Oversaw full software lifecycles and applied structured 8-step root-cause problem solving under rigorous operational standards.

CORE COMPETENCIES & STRATEGIC DOMAINS

- ITSM Transformation (Maximo & ICD)
- Executive & Steering Committee Communication
- AI & Automation (AI Agents, Workflows)
- Multidisciplinary Team Leadership (~20 resources)
- OPEX/CAPEX Budgeting & Vendor Governance
- Enterprise Governance, ITIL, Agile & SAFe
